Essential oils extracted from six Crepidiastrum species were analyzed by GC-MS to identify their chemical composition. These oils were tested for their anti-inflammatory activity on human monocyte-like cells (U937) and used for its characterization in an in vitro model of Epstein-Barr virus (EBV) infection. Despite the fact that the plant genus Crepidiastrum has been widely used in folk medicine for the treatment of respiratory and skin disorders, no scientific studies have been performed to support such ethnopharmacological uses. Antiviral studies on Crepidiastrum monostachyum and C. montanum species were carried out in the present study for the first time./* * Copyright 2009 Red Hat, Inc f678ea9f9e
